

# CAPABILITY STATEMENT

# COMPANY OVERVIEW

**Camilleri Lifting Services (CLS) is a Queensland crane hire company run by expert industry professional Charlie Camilleri. With over 30 years' experience in the heavy industries space, Charlie established CLS to provide custom crane hire and lifting services to the mining, construction and industrial services industries across Queensland.**

Although CLS as a company was formed in 2020, Charlie is not a new player in the industry. He has decades of involvement in the mining, construction and industrial services sectors, with extensive experience working with large multinational companies such as BMA, Wesfarmers, DBCT, Peabody and more. Growing a large crane hire business in Central Queensland from the ground up in 2000, Charlie is one of the most knowledgeable and experienced professionals in the industry.

CLS specialises in custom crane hire solutions, dry hire cranes and other lifting services. Taking into account time, resources and budgets, CLS offers an unparalleled crane hire experience. And, safety and compliance is of utmost importance to us and something we take into account for each and every job. Our expertise includes dry hire cranes such as crawler cranes, franna cranes and more. We work with clients to understand their needs because we know no two jobs are the same, and therefore no two jobs will have the same solution.

## OTHER REASONS TO CHOOSE CLS:

## WHY CLS

At CLS, we provide customised, efficient and effective crane solutions to projects of all sizes. With experience spanning across a range of industries and a safety-first approach, we are Queensland's go-to crane hire and lifting services company. CLS also consults on logistics management for transportation and other lifting projects, and can provide project assessments, site inspections and assessments.

## CORE COMPETENCIES

Charlie has over 30 years' experience managing client projects across Queensland. As an experienced managing director in the crane industry, Charlie's knowledge is unmatched. As a result, some of CLS' core competencies include:

- Heavy lift solutions
- Logistics management for transportation and lifting projects
- Construction equipment, project management and operations
